```
; example of simplified Windows programming using complex macro features

include 'win32ax.inc' ; you can simply switch between win32ax, win32wx, win64ax and win64wx here

.code

  begin:

        invoke  MessageBox,HWND_DESKTOP,"May I introduce myself?",invoke GetCommandLine,MB_YESNO

        .if eax = IDYES
                invoke  MessageBox,HWND_DESKTOP,"Hi! I'm the example program!","Hello!",MB_OK
        .else
                invoke  MessageBox,HWND_DESKTOP,"Sorry to bother you!",":(",MB_OK
        .endif

        invoke  ExitProcess,0

.end begin
```

:(✕

Sorry to bother you!

OK
